

JUICE EXTRACTOR

GZ-4000P

- Voltage : 240v 50Hz
- Rating input power : ~
- Power : 370w
- Speed : 3000rpm
- Productivity : 1200ml/min
- Dimension : 360 x 220 x 300mm
- Net Weight : 6.5kg

The Electric Fruits Juicer is food processing machinery designed, using the modern foreign advanced millstone technology. It juice and press residue will be automatically centrifugalize from fruit or vegetable paste. There are several features of the machine, such as fast pressing juice in high efficiency, safety and hygiene, easy to operate, extensive applications. It is not only suitable for many kinds of fruits and vegetables to press juice such as watermelon, apple, pear, orange, pomelo, peach, almond, pineapple, grape, carrot, celery, spinaches as also suitable for vegetables of more fibrous, such as gingers. The ginger juice is good condiment.

The machine is good looking, compact in construction; the body is made of high grade Al-alloy. All parts in contact with food are made of stainless steel, and are in conformity with Chinese hygiene standard, therefore, it is the best choice to provide a variety in restaurants, emporium, casino, bar, hotel and fibrous milk processing factory etc.

GZ-2000

- Voltage : 240v 50Hz
- Rating input power : 0.75kw
- Power : 0.55kw
- Speed : 3000rpm
- Productivity : 2400ml/min
- Dimension : 380 x 550 x 450mm
- Net Weight : 28kg
