

# 3 IN 1 SHRINK PACKING MACHINE

FM5540 3 in 1 shrink packaging machine achieves film sealing, cutting and shrink in one operation and is a very economical packaging machine for small amount productivity; use POF, PVC, PP as packaging materials. It has three functions: seal, cut, and shrinking. The hot air is kept in a small heating room, which save power consumption greatly.

In the shrinking process, packing products are wrapped perfectly with strong hot circulating airflow. Shrinking process can be observed through transparent cover. FM series machine is widely used in the external packaging of beverage, gift, hardware, cosmetics and plastics, etc.

#### Features:

- Automatic Digital temperature controller
- Automatic hood hold down and release device
- Height adjustable support inside shrinking chamber enables different size products to be packed.
- Sliding film roll holder enables different film widths to be used for packing.
- Equipped with automatic film perforation device

#### FM5540

- Power Source: 220V-240V/50-60HZ
- Shrinking Time: 0-3 seconds
- Seal-cut time: 500-800 times/hour
- Film Thickness: 0.015-0.08mm
- Fan Power: 250w, 2800r
- Power: 3.8kw
- Working Efficiency: 500-800times/hour
- Max. Packing Size: 550mm x 400mm x 300mm
- Thickness of Shrink Film: 0.015-0.08mm
- Weight: 120kg
