

JUICE EXTRACTOR MACHINE

www.banhing.com

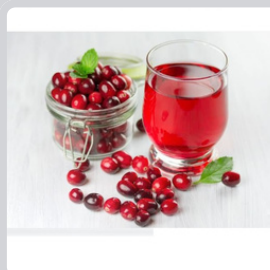

HUROM HU-500- this juicer new generation which cooked juice retains a huge amount of antioxidants and enzymes. This juicer excellent purchase for the whole family that will delight every day cooking healthy and tasty juices.

With a delight not only for their high performance, but also the quality of the squeezed juice. Due to the low-speed spin technology, much less cooked juice oxidizes and foams. And this, in turn, provides a natural, delicious juice, rich with enzymes, vitamins and minerals, to feel the natural taste of all the products that will delight lovers especially juices.

Feature of the new **Hurom (HU-500)** - in the absence of plastic construction biosfenola. This solution is the Korean manufacturer has been associated primarily with the wishes of customers.
